My earlier message should have said EPA has NOT shared the data with city or state yet, so please do NOT share.

All the homes we have sampled are occupied. (One house is not being sampled in Zone 2, because it is not occupied and seems to have a converted garage apt in the back of the lot that is also not occupied.)

Also, all of this data is preliminary. And, the residents and city have **NOT** seen the results yet, so the results should not be shared with anyone until EPA does so.

Hi Mary,

To answer some of your questions, please see the attached sampling spreadsheet for East Chicago/USS Lead.

Both sets of data that we have for Zone 3 are included.

All sites from Zone 2 and Zone 3 that have been sampled are at the top, in order of when the S1 samples (pre-excavation) were collected. Towards the bottom are homes that are scheduled, are pending (out of town, attorney issues, etc) or refused sampling (3) / cannot be sampled (apt bldgs.).

Thanks,

Andrea Porter

Miguel,

I would like to know if the samples you mentioned below were collected from homes that were occupied, I know some of the homes in that area did not have people living in them and in addition if the samples were taken from Tier 1 homes.

Also, is it possible for IDEM to get copies of these sample results?

Thanks

Mary E. Hollingsworth

Sure. If they have OWQPs set, the EP/DS limits would be helpful to know as well.

Those would go to their field inspector. Can I ask East Chicago for them?

Hi Stacy,

We are starting to get the water sampling results back from East Chicago and the first home had 0.05 mg/L as Total P and the second had ND as Total P. Do you have recent MORs you can send with East Chicago's ortho levels at the EPs and DS?
